Dual Diode POW-R-BLOK™ Modules 100 Amperes/200-2400 Volts

CD41 ___ 99, CC41 ___ 99,
 CN41 ___ 99

**Dual Diode
 POW-R-BLOK™ Modules**
 100 Amperes/200-2400 Volts

Ordering Information

Example: Select the complete eight digit module part number you desire from the table — i.e. CD412499 is a 2400 Volt, 100 Ampere Dual Diode POW-R-BLOK™ Module.

CN—Common Anode Diode Module
 CD—Dual Diode Module
 CC—Common Cathode Diode Module

Description

Powerex POW-R-BLOK™ Assemblies combine multiple power semiconductor devices in a single, electrically isolated module. This dense, cost-effective packaging is made possible by Powerex's proprietary *glass passivation* process, in which each semiconductor junction is sealed with a protective layer of glass. Exhaustive testing at high voltages and high temperatures has demonstrated the excellent parameter stability of these glass-protected products.

The POW-R-BLOK™ features a self-contained electrical isolation system. The use of BeO ceramic isolators with high thermal conductivity has achieved excellent circuit-to-baseplate isolation (≥ 2500 volts RMS), while maintaining efficient cooling of the semiconductors. POW-R-BLOK™ has been tested and recognized by Underwriters Laboratories (QQX2 Power Switching Semiconductors).

Features:

- Glass Passivation
- Hybrid Construction
- Isolated Base Plate
- Insulated Package
- Low Thermal Impedance
- Metal Base Plate
- UL Recognized

Applications:

- Battery Supplies
- DC Motor Power Supplies
- AC Motor Power Supplies
- Center Tap Circuits

Benefits:

- No Additional Insulating Components Required
- Easy Installation
- Reduced Engineering Time
- Improved Heat Transfer
- Voltage Stability

WARNING:
 Internal insulation used is Beryllium Oxide. User should avoid grinding, crushing or abrading these portions. Care must be exercised in properly disposing of unwanted modules.
