Description

Powerex Dual SCR POW-R-BLOK™ Modules combine multiple power semiconductor devices in a single, electrically isolated module. This dense, cost-effective packaging is made possible by Powerex's proprietary *glass passivation* process, in which each semiconductor junction is sealed with a protective layer of glass. Exhaustive testing at high voltages and high temperatures has demonstrated the excellent parameter stability of these glass-protected products.

The POW-R-BLOK™ features a self-contained electrical isolation system. The use of BeO ceramic isolators with high thermal conductivity has achieved excellent circuit-to-baseplate isolation (≥2500 volts RMS), while maintaining efficient cooling of the semiconductors. POW-R-BLOK™ has been tested and recognized by Underwriters Laboratories (QXX2 Power Switching Semiconductors).

Features:

- Glass Passivated Chips
- Hybrid Construction
- Isolated Base Plate
- Low Thermal Impedance
- Metal Base Plate
- UL Recognized
- Quick Connect Gate Terminals

Applications:

- Motor Speed Control
- Battery Chargers
- Tap Changers
- Transfer Switches
- Lighting Controls
- Power Line Applications of 120, 240 or 480 Volts

Benefits:

- No Additional Insulating Components Required
- Easy Installation
- Reduced Engineering Time
- Improved Heat Transfer
- Voltage Stability
